WIFI**RANGER**™ CONNECT & CONTROL. COMPLETELY.™

Quick Start Guide

ADDITIONAL INFORMATION & SUPPORT AT WiFiRanger.com

■ Power On WiFiRanger Sky[™]

Look for a toggle switch in RV labeled as WiFiRanger Sky4. Switch on and wait 2-3 minutes for the unit to find an internet signal.

2. Wirelessly connect your smartphone, tablet, or computer to Network: Pvt.WiFiRanger Sky4...

9560 is for example purposes only. Your Network name will have their own unique 4 digits. Do not look for 9560.

3. Enter Password: changemenowXXYY

For XXYY values, use the last 4 digits from your unique Network name in Step 2. Remember, your Network name will have their own unique 4 digits. Do not try to use 9560.

Visit 10.1XX.YY.1:8080

XXYY values are the same as described in Step 3 above. If the above numeric web address does not load in your browser, visit MyWiFiRanger.com.

5. Click Scan, then connect to desired network.

The network you select may require a password from network host (e.g. RV Park office, coffee shop employees, etc.)
