

## Leprechaun - Exterior Feature Benefits

<b>Azdel</b>	This composite material is 50% lighter weight, impervious to water and mold. It also gives a higher R value and acts as a sound barrier to give a quieter ride. Plus, Adel is a formaldehyde free material to eliminate toxic fumes in the coach. And with the 2" wall construction, which is 20% thicker than our competition is gives us a more rigid wall for longer lasting coach.
<b>In-House Chassis Modification</b>	By Coachmen being authorized by FORD and CHEVY to modify the chassis on our campus it allows us to provide strict quality control cutting out the middle man, adding frame rail sections for more rigidity all while using OEM certified parts.
<b>Maximum length awnings</b>	The powered awnings are adjustable, and extend almost the entire length of every floor plan giving you a bigger outdoor living space. By placing the slideouts on the driver side of the coach it also is a safety feature by eliminating the threat of someone running into the corner of the slideouts on the activity side of the coach.
<b>Integrated entry step</b>	this 2 step entry eliminates mechanical parts with a dual battery tray. Also this 2 step entry enables a lower living room area allowing us to offer swivel seats in the cock pit area.
<b>Warehouse Exterior Storage</b>	Our exterior storage is about 40% larger than our competition. Not only is it larger allowing for more gear but we use a military grade material for the compartments called Rotocast. Rotocast is seamlessly installed with weep holes in each compartment allowing for multiple uses such as an outside cooler by putting ice in them. Plus, we give at least 2 access doors to every storage area.
<b>Exterior Entertainment Center</b>	Coachmen uses a brand called Furrion that is tested for cold and hot weather as well as put through a stress test to make sure it can withstand the rigors of a coach going camping in all kinds of elements.
<b>50 Gallon Fresh Water Tank</b>	Coachmen designs our coaches to be used not just in a campground but also to go dry camping. By offering a fresh water capacity that is at least 20% larger than our competition, you the customer can enjoy your motor home for longer periods of time even if you are not a camp ground. The exception is the 270Qb at 40 gallons and the 280BH at 46 gallons.
<b>68 lbs. of LP</b>	Again, Coachmen offers the largest LP tank allowing for longer dry camping capability.
<b>Hep-O Valve</b>	This type of drain line uses no water, is low maintenance but most importantly it prevents odors or gases from holding tanks to seep into the motorhome which is much more sanitary than the traditional "p-traps" that most of our competition uses.
<b>PEX Plumbing Lines</b>	This type of plumbing gives superior water, requires less fittings reducing the chance for leaks, resistant to freeze breakage but also prevents heat transfer which conserves energy.
<b>Ride Rite Suspension</b>	This feature is available for the Premier package only but it will improve your ride by smoothing out your ride even when hitting potholes on the road. And once you arrive you can independently inflate or deflate the airbags to help level the motor home at the campsite.
<b>Water Works Compartment</b>	This compartment offers a blank tank flush, exterior pump switch and single hose inlet allowing for easier set up and tear down and winterizing. All with a LED light to allow for set up even in the dark.

## Leprechaun - Interior Feature Benefits

<b>1.5" Transition Step</b>	Coachmen offers the smallest transition step from cab to coach in the industry which gives MANY benefits. First of all, it allows for everyone seated in the back of the coach to see out the front windshield preventing car sickness. It also allows for the option of cockpit swivel seats as well as ease of movement for the customer to go from cab to coach.
<b>Even Cool A/C System</b>	This residential style duct work allows for superior and more efficient air flow that is quieter and will cool the coach much quicker than our competition. This system is standard in 13.5 but with the option to upgrade to the 15k with heat pump. n/a 20cb and 21qb
<b>One-Piece Countertops</b>	This 1 piece water resistant countertop has a residential feel with no seams. You will also notice it has a bull nose edging no sharp corners and no glued T-molding. This style is also about 30% lighter weight than what most other competitors offer.
<b>80" Residential Beds</b>	We offer a full size residential queen bed that is 80" in length on all floor plans. Where most of our competition offer what is called a "RV queen" that is 6-8" shorter, we will give you that much more leg room. But also saves money by being able to use the bedding you have at home instead of buying RV sheets. Plus, we have the option for a pillowtop mattress to give even more comfort.
<b>Optional 4-point Electric Stabilizer Jacks</b>	This optional electric system makes it much easier for setting up and tearing down. And once it is set up it will help prevent the rocking motion while using your motor home.
<b>Bed Side Charging Station</b>	Each motor home comes standard with multiple ports for all sorts of electronics. By offering, 110, 12 volt, USB outlets you can charge any electronic device including your CPAP machine.
<b>95" x 57" Cab Over</b>	By offering the largest cab over in the industry, we can give you more sleeping space or more room for your cargo. We are also the only OEM to offer both a child safety net and ladder to the cab over. But don't let just the size impress you, we also use an aluminum floor which allows us to offer more weight capacity and longer life to your floor where most of our competition offer only a wood construction in their floor.
<b>Child Safety Tether</b>	Coachmen makes sure that your family and friends are safe while traveling with multiple seat belts in the back but we go the extra step and give the customer a safe place to attach a child safety seat. And make sure you notice that our seatbelts use a NUT and Bolt to fasten the safety belts.
