by Coachmen

CAMPING TRAILERS

**Coachmen**<sup>®</sup>  
Recreational Vehicles  
A division of Forest River, Inc.

**Camping Made Easy**

Clipper's unique, user-friendly cable support system increases leisure time. Set up in ten minutes and head out for adventure!

The easy-to-use dual drive winch and drill bit, combined with your cordless drill, raises or lowers the roof in under 30 seconds. A manual crank is also provided.

The four heavy duty scissor-style stabilizing jacks extend and retract easily using your cordless drill and the provided drill bit.

This exclusive "Glide-N-Lock" cable supported bed system eliminates the need for support poles under the beds. Simply pull out the bed, click and it's locked into place.

X-Cable technology adds additional stability to the roof and prevents over cranking of the roof.

Clipper's exclusive two-piece tension rafter is another example of how Clipper makes set up easier.

## Clipper is Easy

The E-Z Swing Stepper Door with hydraulic assist, operates in seconds and provides the largest, most stable step platform in the industry.

Clipper's one piece entry door has an extra large adjustable privacy panel to let in fresh air and sunlight.

Clipper's exclusive J-Track door latch maximizes stability by eliminating the flimsy nylon turn buttons traditionally used in securing the door to the roof.

## More Clipper Exclusive Features

### Roof Side Z-Rail

Channels water away.

- A.** Water tight Seal
- B.** Roof's Outside Skin
- C.** Z-Rail channels water away from wood
- D.** Body's Outside Skin

- Z-Rails on roof perimeter and sidewalls keep wood above water level collection points.
- Others use U channel where wood and water can come in contact at the bottom of the channel.
- Channels are kept open to allow water to run out like a gutter.
- Others attempt to seal channels to keep water out; when the seal is compromised, water will collect and cannot escape.

Clipper's Super Sliding Storage box enables full, easy accessibility even when the camper is set up. (Standard on Legend, Optional on V1 and V2).

### Four Layer Insulated Roof

Braced for Air Conditioning.

- 1. One Piece Seamless Fiberglass Skin**
- 2. Luan Plywood Underlayment**

No one else includes the extra wood layer between the top skin and internal foam that provides stiffness and reduces the probability of damage due to hail, road debris, etc.

- 3. Foam Insulated Roof Structure**
- 4. Vinyl Coated Ceiling**

Easy to clean and minimizes interior condensation

- Roof vent is placed off to the side so the A/C can be center-mounted without having to remove the vent. This design allows you to have both the vent and A/C.

### Wide Trac Suspension

Better safety and stability on the road.

- Widest stance of any folding camper
- Improves towing safety and stability
- Stronger axle beams than most competitors
- Steel frame with E-coat protection

Dexter® E-Z Lube® Axles

Check Out Our Easy Set Up Video Here

### 4" E-Z Sleep Quilted Mattress

1-1/4" Laminated Insulated Bunkend

COLD OUTSIDE AIR

Clipper

### 1-1/4" Laminated Insulated Bunkends

- Two times thicker than others
- Solid wood, steel reinforced frame, with 1" thick high density foam, and laminated wood panels top and bottom
- More stable bed end vs. chipboard or spliced plywood
- Insulation improves comfort and warmth

COLD OUTSIDE AIR

Competitors

Clipper's one-piece, 5/8" floor structure is stronger than the industry's standard 1/2". Automotive undercoating protects from the elements. Congoleum residential grade Diamondfloor with 100% adhesion adds beauty and durability indoors.

E-Z Roll, lined privacy drapes

X Cable technology stabilizes the roof and prevents over cranking

**1285SST**

High density foam enhances comfort and durability

Retractable clothes bar  
(Standard on Classic and V-Trec models)

Powerful Fantastic power roof vent moves air like no other.

Jensen AM/FM/Bluetooth stereo with App control includes Interior/Exterior speakers  
(Standard on Classic and V-Trec models)

Exterior grill (N/A on LS series)

The Goshen Stamping double-wide lifter system offers strength, stability and increased wind resistance.  
(Limited lifetime warranty)

LED bunk end fan lights

The E-Z one-hand swing level galley  
(Classic and V-Trec models)

Express 9.0TD (With Deluxe Package)

Easy To Enjoy!

### Coachmen Interactive Mobile Manuals

Download your Coachmen mobile app or visit our dynamic online manual to enhance your ownership experience. These interactive options provide incredible ease and insight into use, maintenance and enjoyment of your Coachmen product. Ranging from "How-To" videos, pictures and illustrations of various components, systems and features to fully searchable content and downloadable PDFs for individual component owner's manuals, answers are always just a click away.

**GVWR (Gross Vehicle Weight Rating)** – is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

**GAWR (Gross Axle Weight Rating)** – is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

**UVW (Unloaded Vehicle Weight)\*** – is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

\*Estimated Average based on standard build optional equipment.

**CCC (Cargo Carrying Capacity)\*\*** – is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

\*\*Estimated average based on standard build optional equipment.

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.
