Apex Is Certified Green TRA Gold Level Rated
As a Certified Green RV, APEX utilizes effective production techniques in combination with healthy materials, plus efficient usage of energy and water to produce a high quality RV with less environmental impact.

Six Layer Laminated Floor
A. Residential durable insulated floor covering
B. Double layer Lauan plywood top decking
C. Welded aluminum frame
D. Block foam structural insulation
E. Lauan plywood bottom decking
F. Darco waterproof floor wrap
G. Cross member support
H. Holding tanks
I. Heated and enclosed underbelly (Double axle models)

Apex features the combination of environmentally friendly Azdel Onboard RV composite panels and Alumicage Construction to maximize towability.

Azdel composite panels are produced using a patented blend of polypropylene and fiberglass to create a durable, lightweight, water and temperature resistant, odorless and environmentally friendly wall that will increase the life of your RV.

Weight Matters 50% Lighter than wood
Let it Rain No mold, rot, mildew, warping or delamination
Unaffected by changes in temperature & humidity
Twice the thermal insulation of plywood
Free of formaldehyde, toxic odors and chemicals
Longer RV life
Quieter RVs
No deforestation

Knock on Wood
Traditional Lauan Sidewall Panels:
- Absorb and retain water
- Affected by humidity and temperature changes
- Susceptible to mold, rot, warpage and delamination
- Imported
- Heavier
- Inferior thermal insulation and noise blocking

Avoid Costly Water Damage
- Water and wood don’t mix
- Water can cause rot, mold and delamination of wood sidewall panels causing thousands of dollars in damage.

Soak Test
- 60 Day soak test
- Wood has visible mold and decay requiring wall repair
- AZDEL was 100% unaffected

Lower Center of Gravity for Better Towability

GVWR (Gross Vehicle Weight Rating) – is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) – is the maximum permissible weight of the unit as manufactured at the factory. It includes all weight at the unit’s axle(s) and tongue or gooseneck and LP Gas. The UAW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated Average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** – is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UAW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and grey tanks to provide for more cargo capacity.

**Estimated average based on standard build optional equipment.
Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit. All information contained in this brochure is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Forest River, Inc., reserves the right to make all such changes without notice, including prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models shown in this brochure. Therefore, please consult with your Forest River dealer and confirm the existence of any materials, design or specifications that are material to your purchase decision.
