YOUR GUIDE TO SUCCESS WITH THE BEYOND CLASS B
by COACHMEN RV – The Leader to the Great Outdoors!

The most comprehensive Class B Training Manual in the Class B segment!
DID YOU KNOW? COACHMEN RV PRODUCTS HAVE BEEN ON U.S. ROADS AND HIGHWAYS SINCE 1964!

- COACHMEN RV… Is built upon a simple principle “Dedicated to the enrichment of your life.” By providing you with long term value through all that we do, our focus is on delivering a product with superior value and backing it through superior service and support. Once you become a Coachmen owner, we are committed to enhancing your Coachmen RV ownership and lifestyle experience… creating friends for life and memories that will last a lifetime. At Coachmen RV you will find a rich history of commitment from our Team Members. This commitment extends to our owners and in the pride we have for our brand. The close relationship that we share with our owners and our dealers is a quality that others have been trying to mimic over our 50 year history. Our goals and principles remain well in focus. We create customers for life.

- OUR HISTORY… The first Coachmen RV products were manufactured in a 5,000 square foot plant in downtown Middlebury, Indiana, by Coachmen Industries, a company founded by three brothers: Tom, Keith and Claude Corson. Coachmen’s first year of production totaled 12 travel trailers, a single truck camper and 80 truck caps. Since then, over three quarters of a million Coachmen Recreational Vehicles have been produced and sold.

- FOREST RIVER INC… In December of 2008, Coachmen RV became a proud brand of Forest River, Inc., a Berkshire Hathaway company. Today, Coachmen RV, a division of Forest River. Inc., is headquartered in Middlebury, Indiana, with our primary manufacturing facilities occupying over 220 acres with more than 23 acres under roof serving as dedicated manufacturing facilities for Coachmen branded Class A Motorhomes, Class B Motorhomes, Class C Motorhomes, Fifth Wheels and Travel Trailers. Our Camping Trailers are manufactured in our Centerville, Michigan, manufacturing facilities occupying 90 acres.

- A BRAND YOU CAN TRUST… Coachmen RV products have been on North American roads and in North American campgrounds since 1964. With over five decades of building recreational vehicles. Over 600,000 RVs built and sold we know how to design and build a reliable RV with exceptional value, dependable design, practical innovation and the comforts and features you desire.
Coachmen RV and Ford have combined their decades worth of experience to introduce BEYOND, a Class B Motorhome that offers the utmost in quality, luxury and value. The BEYOND is built on the award winning 350 Ford Gas Transit platform with a 3.7 Ti-VCT V6 Engine which delivers an impressive 275HP & 260FT. LBS. of torque while still providing excellent fuel economy of 16-18 MPG on the highway. BEYOND uses high end components like the Truma Combi Eco Plus furnace/water heater system, Marine Grade PVC wall vinyl, Sumo Spring Suspension and custom solid maple hardwood cabinetry!

BEYOND WHERE QUALITY AND VALUE ARE #1
Safety Features of the Ford 350HD Gas Transit Chassis Continued…

**FRONT SAFETY CANOPY side-curtain airbag...**
The Safety Canopy System combines side-curtain airbags and a rollover sensor to help provide head protection for all outboard seating positions in certain side-impact and rollover situations. Front-seat side airbags help protect the torso and pelvis of front-seat occupants in certain side collisions. The airbags are located in the outboard side of the front seat backs, so they are always in the correct deployment position, no matter where the seat is positioned.

**Advance Track with RSC...**
Advance Track with RSC (Roll Stability Control) combines Advance Track electronic stability control and Roll Stability Control technologies to monitor vehicle cornering behavior and automatically make braking and throttle adjustments when it senses wheel slip, loss of traction or roll motion to help keep the vehicle on its intended path for enhanced driver control.

**Lane Keeping Assist...**
Warns the driver if the vehicle starts to drift into another lane and the turn signal has not been activated using a series of vibration pulses that are felt through the steering wheel and a visual indication (red line) in the message center.

**Auto Lamp with Rain Sensing Windshield Wipers...**
Wiper-activated headlamps automatically turn on the headlamps and tail lamps when the windshield wipers are being used — helping the driver see, and the vehicle to be seen, in inclement weather. Rain-sensing windshield wipers detect moisture on the windshield and activate the wipers to help increase driver visibility. Once the system is turned on, there is no need for the driver to activate, deactivate or adjust wiper speed under normal driving conditions.

**Hill Start Assist...**
Hill start assist automatically engages the brakes when the vehicle is started on an upward or downward slope to prevent it from rolling, whether in a forward gear or Reverse (R).

**SOS Post-Crash Alert System...**
The SOS Post-Crash Alert System automatically flashes the hazard lights and intermittently sounds the horn after an accident where the airbag(s) deploy(s) or when a properly engaged safety belt pretension is activated.

**Side-Wind Stabilization...**
Applies the brakes on one side of the vehicle to reduce the effect of a sudden side wind gust on the vehicle’s path.
BEYOND FLOOR PLANS

22C Rear Couch

22D Rear Dinette
BEYOND COCKPIT FEATURES

- Swivel Passenger Seat w/Standard Privacy Shades and overhead storage
- More Leg Room and Recline distance compared to Winnebago Paseo

CONTROL PANEL LAYOUT AND FEATURES

Truma CP Plus Control for Truma Combi Eco Plus

Wi-Fi Ranger On/Off

NEW! MULTI PLEX TOUCH SCREEN CONTROL… TANK LEVELS, AUTO GEN START, AWNING, INTERIOR/EXTERIOR LIGHTING

Xantrex Freedom X Remote Panel-
Allows you to control and monitor your 2000W Xantrex Pure Sine Wave Inverter

Go Power Solar Charger

Battery Disconnect
• Control all coach lighting from the push of a button
• No more searching for light switches
• Customer can set the lighting to their preferences inside the coach
• While Multi-Plex Wiring is beneficial for convenience this technology cuts down on the amount of wire used and connections vs. a coach without Multi-Plex wiring

• Select the POWER setting and you will find the AGS or Auto Gen. Start
• This function allows you to pre-program your generator run time and your generator's quiet time
• The Auto Gen Start function also allows the customer to pre-program the generator to Auto Start at the customer's desired temperature. This feature is great for those that travel with pets and have to leave them in the coach without the worry of their pets getting too hot
• The Auto Gen Start function also allows the customer to pre-program the generator to start if the coach batteries voltage draws down to a certain level
• All of the above are customizable to your customers' needs and camping preferences

• Even our Climate Control functions are through your FireFly Multi-Plex System
• This allows for more accurate control of your heating and cooling of the customers' coach
• Added convenience of having both your HEAT and AC controls at your fingertips

• Convenient 2nd Multi-Plex Control panel (Coach Lighting Only) in rear of coach
• No more searching for light switches in the middle of the night
NEW! 12V/30AMP DIGITAL SOLAR SINGLE STAGE CONTROLLER

SOLAR FLEX SOLAR PANELS FEATURE A 5 YEAR WARRANTY

100 W Standard
200 W Optional (Retail $535)
Truma Combi Eco Plus – The first forced-air combination furnace with integrated water heating function and with more than 20 years of reliable service in Europe and Australia. Truma Combi furnaces are the most energy-efficient and lightest heating systems on the market. They effectively combine warm air and hot water in one appliance. Truma Combi furnaces offer much more operating convenience by way of the digital control panel Truma CP plus.

Unique Features
- Near-silent operation
- Lightweight, space-saving solution
- Maintains constant temperature throughout RV
- Optional electric heating for furnace and water
- Highest available energy efficiency of more than 90%
- Program your timer to have hot water ready.

Be sure to let your customers know there are many videos available on YouTube on the operation of the Truma CP PLUS
**TRUMA COMBI ECO PLUS FURNACE / HOT WATER HEATER**

---

**Truma Combi**

Quick Reference CP Plus Functions

**ADJUST ROOM TEMPERATURE**
- Range: 40-86°F (5-30°C)

**SELECT ENERGY MODE**
- a) LP gas
- b) MIX 1* - Electricity 850W + Gas
- c) MIX 2* - Electricity 1700W + Gas
- d) EL* - Electricity 850W
- e) EL* - Electricity 1700W

**ADJUST WATER TEMPERATURE**

A) **BOILER**
- Hot water generator is on.
- Icon flashes until desired temperature is reached.

B) **ECO**
- Water temperature is 104°F (40°C)

C) **HOT**
- Water temperature is 140°F (60°C)

D) **BOOST**
- Boiler content is heated quickly (boiler priority) for up to 40 minutes. The water temperature is then kept at the higher level (about 144°F (62°C) for two subsequent heating cycles. When the water temperature is reached, the room is heated again.

---

**Truma Combi**

Quick Reference CP Plus Functions - Cont.

**SET CLOCK TO CURRENT TIME**

**SET TIME SWITCH**
- Set a start time and end time for room temperature, water temperature, energy mode and fan speed set points.

**SETTINGS**
- Index - Show version number of connected device
- Bright - Adjust backlighting

Onan QG 2800 Gasoline RV Generator

Cummins Onan RV QG 2800 (formerly Onan Microlite) Lightweight, Compact and Quiet RV Generator. Microprocessor control with diagnostics and lightweight, compact design. Quietest generator sets of their size. Easy maintenance with single-side service. Completely enclosed with muffler, quick and easy to install. 3-year limited warranty, Low fuel consumption, The RV QG 2800 is a 2800 watt gasoline generator.

- Microprocessor control with diagnostics and lightweight, compact design.
- Gasoline fueled.
- Quietest generator sets of their size.
- Easy maintenance with single-side service.
- Completely enclosed with muffler, quick and easy to install.
- 3-year limited warranty
- Low fuel consumption
- 2.8kW QG RV generator set will start and run one 13500 Btu high efficiency air conditioner (15.5 amps or less) plus 600 watt base load with an additional 300 watts of power available.

Warranty policy: This limited warranty covers virtually everything except routine maintenance for the first two years you own your RV generator set, and covers parts and labor on major powertrain and generator set parts during the third year. In addition, it also includes a free 90-day adjustment policy, which provides that Cummins Inc. will make minor adjustments during the first three months you own it - free of charge! Please note: This 3-year limited warranty applies to RV generator sets used in RV applications only, and does not apply to RV generator sets used in commercial mobile applications.
ONAN RV QG 2800 Gas Generator

Microprocessor control with diagnostics and lightweight, compact design
• Gas Fueled
• Quietest generator sets of their size
• Easy maintenance with single-side service
• Completely enclosed with muffler, easy to install
• 3-year limited warranty
• Low fuel consumption

OIL/DIPSTICK

GENERATOR FEATURES • Cummins Onan sound-attenuating enclosure • Focalized mounting system with vibration isolators • Cross-flow cooling • Sheet steel drip controlling base • Enclosed muffler • Integral USDA Forest Service approved spark arrestor muffler • Adjustable mechanical governor • Automatic choke • Overhead cam • Single-side service • Low oil level shutdown • Electric fuel pump (gasoline) • Mounted control panel • Sealed remote start connector • Electric start • Fused DC circuits to protect set wiring and remote control wiring • Magnetic circuit breaker • Solid-state ignition • Standard onboard diagnostic capability

!!!CUSTOMER SERVICE TIP!!!
MAKE SURE TO TELL CUSTOMERS WITH GENERATORS THAT THEY NEED TO FIRE UP THE GENERATOR APPROX. 1 X PER MONTH TO ENSURE PROPER FUNCTIONING!!!

MANUAL START SWITCH w/CIRCUIT BREAKER BELOW
RELION 330AMP HOUR AGM BATTERY

RELION R4000 Dry Series, maintenance-free batteries, are designed to provide premium performance!

READY WHEN YOU ARE: RELiON R4000 Dry Series are deep cycle batteries that deliver high capacity from the get-go. Unlike traditional lead-acid batteries that need to be “worked up” to increase capacity, these batteries give you the range or hours of operation you need right away.

HIGH PERFORMANCE IN LOW TEMPERATURES: Batteries don’t like cold temperatures, but RELION R4000 Dry Series batteries deliver more capacity than traditional lead-acid batteries, even in extreme conditions.

FORGET ABOUT ACID: No need to worry about spills or acid-residue. You’ll never need to replace a corroded chassis or damaged floors due to acid spillage.

SAVE WATER AND WORRY: Using your batteries in a remote location? Is your access limited? Maintenance-free RELiON R4000 Dry Series batteries are perfect for applications where watering is easily neglected or very inconvenient. Traditional lead-acid batteries are subject to reduced performance or early failure if not watered regularly.

LOW SELF-DISCHARGE: RELiON R4000 Dry Series batteries are the ideal solution for infrequent or seasonal use since self-discharge is significantly less than traditional lead-acid batteries. Less frequent, if any, charging is needed during storage.

WE DON'T PASS GAS: Non-hazardous, clean RELiON R4000 Dry Series batteries emit no gasses during normal operation. They can be used safely near sensitive equipment or people.

INSTALLATION SENSATION: Thanks to their innovative design, RELiON R4000 Dry Series batteries can be installed upright or on their sides, making for flexible installation options in a variety of applications.

NEW! AGM 330AMP HOUR 8D BATTERY

- 8D 330AMP HOUR BATTERY DIMENSIONS: 20.8”x 11.1”x 9.8”
- WEIGHT: 182LBS
