STRETCH OUT & RELAX
A Proud History of Quality and Value...Coachmen RV, a brand you can trust!

Coachmen RV has been on US roads and highways since 1964. Since then, over 750,000 Coachmen recreational vehicles have been produced. In December 2008, Coachmen RV became a proud brand of Forest River, Inc., a Berkshire Hathaway Company. We’re headquartered in Middlebury, Indiana with our primary manufacturing facilities on nearly 120 acres, and approximately 13 acres under roof.

Ultra Lite towability – proven construction that lasts

Freedom Express is one of Coachmen RV’s most popular brands with time-tested construction, combined with customer driven innovations. We focus on offering a wide selection of incredibly lightweight and durable travel trailers. These Ultra Lite RVs are ideal for towing with half-ton pick-up trucks and SUVs for maximum fuel efficiency.

All models are built with lightweight, corrosion resistant, Alumicage™ construction utilizing air-craft grade aluminum material throughout the walls for superior strength. Plus, Azdel Onboard® composite wall panels withstand rot, mold and water damage for years of worry-free use.

Explore our selection for the ultimate in safety and reliability:

- **Freedom Express Ultra Lites** – Packed with industry leading features.
- **Liberty & Maple Leaf Editions** – Include high end amenities usually reserved for travel trailers and fifth wheels costing thousands more.
- **Select** – Value added light weights.

A Proud History of Quality and Value...Coachmen RV, a brand you can trust!
Weight Matters
50% Lighter than wood

Let it Rain
No mold, rot, mildew, warping or delamination

Unaffected by changes in temperature & humidity

Twice the thermal insulation of plywood

Free of formaldehyde, toxic odors and chemicals

Longer RV life

Quieter RVs

No deforestation

Azdel composite panels are produced using a patented blend of polypropylene and fiberglass to create a durable, lightweight, water and temperature resistant, odorless and environmentally friendly wall that will increase the life of your RV.

Knock on Wood
Traditional Lauan Sidewall Panels:
• Absorb and retain water
• Affected by humidity and temperature changes
• Susceptible to mold, rot, warpage and delamination
• Imported
• Heavier
• Inferior thermal insulation and noise blocking

Avoid Costly Water Damage
• Water and wood don’t mix
• Water can cause rot, mold and delamination of wood sidewall panels causing thousands of dollars in damage.

Soak Test
• 60 Day soak test
• Wood has visible mold and decay requiring wall repair
• AZDEL was 100% unaffected

The 81” interior height throughout each Freedom Express model results in taller slide rooms and exceptional 14” overhead kitchen cabinet storage. (Other brands have 12” overhead cabinets.)

This exclusive utensil drawer provides handy storage. Seamless Edge countertops are standard on Freedom Express. Solid surface countertops are standard on Liberty and Maple Leaf.

A fully walkable roof makes maintenance and inspections safe and easy.

Exterior FRP fiberglass

Interior décor

Exterior FRP fiberglass

Interior lauan plywood

Aluminum frame & polystyrene core

Lightweight Freedom Express features the combination of Azdel Onboard RV composite panels and Alumicage Construction to maximize towability; both are environmentally friendly.
Every Freedom Express unit undergoes rigorous testing before delivery, to ensure customer satisfaction.

- All tanks are filled with water and then drained, to check for leaks. Toilets and showers are filled with water and drained, to assure the underbelly has no leaks.
- All appliances undergo hy-pot testing. The hy-pot test sends quick, high voltage through all electrical lines, to make sure all lines are clear and appliances are working properly. An additional continuity test is conducted to make sure there are no shorts and the unit is grounded.
- Finally, every Freedom Express is Seal Tech tested to check for exterior leaks. The unit is completely closed and pressurized with up to 40 pounds of air, then hand sprayed with soapy water. Bubbles indicate a leak. Any detected leaks are repaired and the unit is retested. Once the unit passes these inspections, and is weighed, it’s ready for delivery.
**ULTRA LITE EDITION**
